# ABOUT FEBT

**The Faculty of Economics, Business, and Tourism (FEBT) was established in 1975. Today, with around 2,400 students and 127 employees, FEBT is one of the largest faculties in Croatia and part of the University of Split - Croatia's second-largest higher education institution.**

FEBT is located in Split, the second-largest city in the Republic of Croatia and is the largest constituent of the University of Split (UniST).

FEBT employs 127 staff, of which 92 are academic and 35 are administrative positions. At present, slightly over 2,400 students are studying in one of twelve study programmes offered by FEBT at the level of undergraduate and graduate university and professional study programmes and postgraduate specialist and doctoral study programmes.

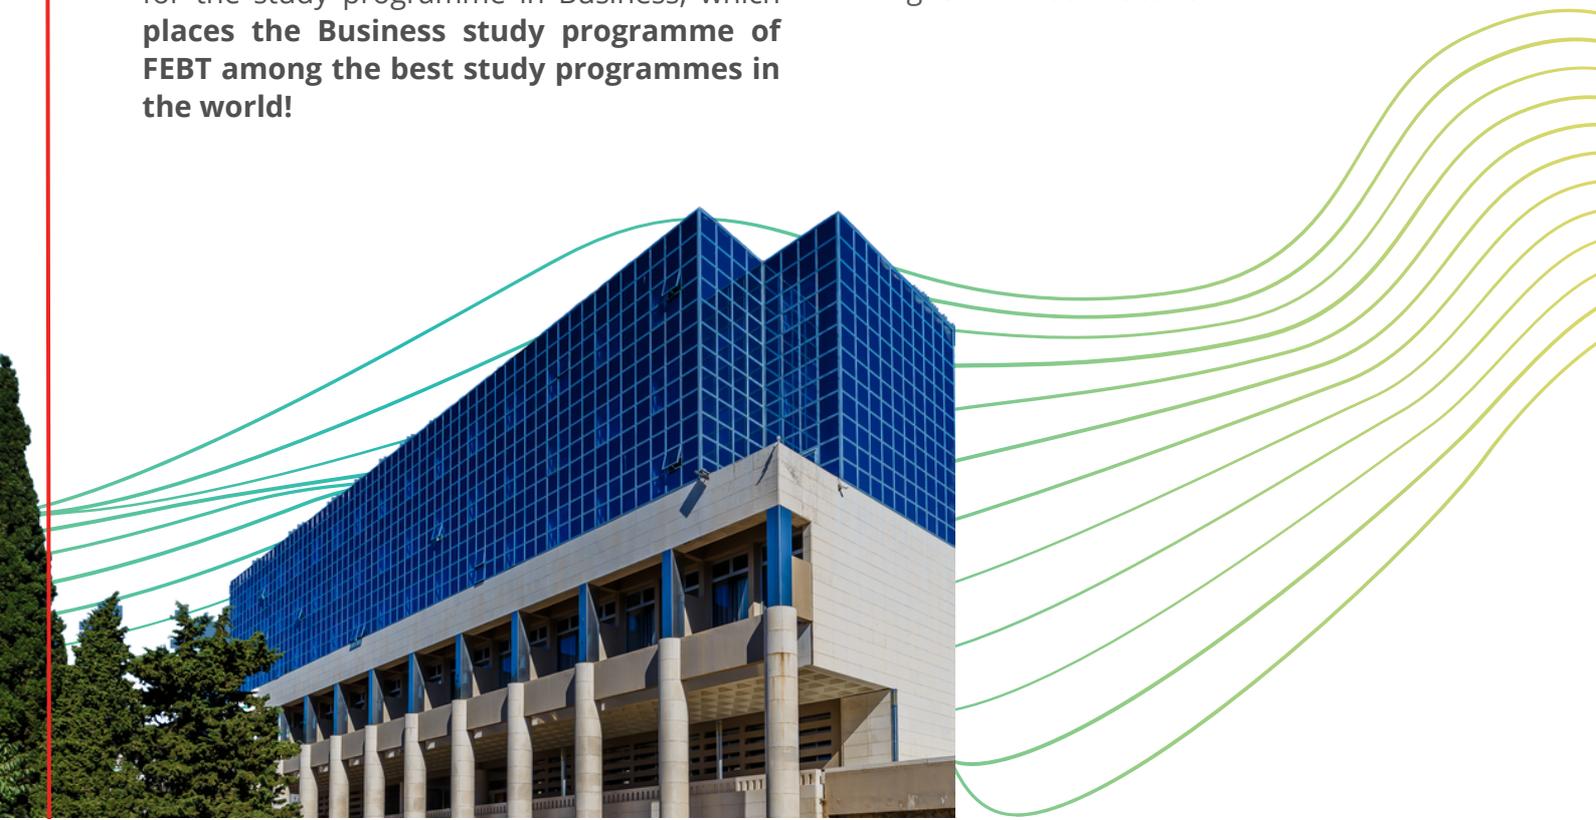

In 2022, FEBT was awarded the prestigious **EFMD (European Foundation for Management Development) accreditation** for the study programme in Business, which **places the Business study programme of FEBT among the best study programmes in the world!**

FEBT was declared the **leader in Croatia in support of the development of Start-ups through the Student Business Incubator.**

The Student Business Incubator (SBI) has operated at the Faculty of Economics, Business, and Tourism since 2015. It is intended for all University of Split students inclined toward entrepreneurship.

The Faculty offers students the opportunity to complete part of their studies or professional practice abroad at over 60 renowned institutions from more than 20 countries and inclusion in the world of work through international professional training in over 100 companies and associations from the most diverse spheres of activity.

The faculty offers a wide range of courses taught in English for exchange students (on mobility schemes) with plans to provide full-time programs in English in near future.

# FROM SMART TO INTELLIGENT CITIES

JUNE 18 - 22, 2018

## Course description

The Summer School presented the most prominent challenges of the concepts “Smart Cities” and “Intelligent Cities” while giving the participants an opportunity to understand and contribute to the challenges faced by modern cities and to explore more efficient solutions in modern urban development, at the same time becoming a part of a network of academics and practitioners working in the field.

The Summer School offered three courses on the topic “FROM SMART TO INTELLIGENT CITIES”:

- FROM SMART TO INTELLIGENT CITIES; CONCEPTS, METHODS, POLICY FRAMEWORK
- FROM SMART TO INTELLIGENT CITIES; CONCEPTS, METHODS, DIGITAL TRANSFORMATION
- FROM SMART TO INTELLIGENT CITIES; CONCEPTS, METHODS, TOURISM PERSPECTIVE

## Target audience

- Graduate and postgraduate students in economics (or in social sciences, technical sciences, or science-related fields) who intend to round out their knowledge in the field and use it in the process of preparing dissertations
- Holders of undergraduate degrees or students in last year of their studies in economics or the social sciences who wish to study the field
- Researchers and professionals working in the field

# FROM SMART TO INTELLIGENT CITIES
