Grading and evaluating student work in class and at the final exam	During the semester there will be two tests (theoretical material), which will bring a maximum of 60 points. The practical part of the exam will be checked through four assignments, which will give students maximum of 100 points. Based on direct activities in exercises and active participation in self-evaluation activities, students can achieve up to 20 points. A student who earned at least 130 points during the semester, with at least 3 assignments (and at least 60 points from the exercises) and achieved a total of at least 60 points from the tests (and at least 25 points in each particular test) will be considered that he passed the exam and will be offered an appropriate grade. The rating scale and the corresponding ratings are as follows: 130-140 points = sufficient (2) 141-160 points = good (3) 161-180 points = very good (4) 181-240 points = excellent (5) * If a student does not collect 130 points during the course (or does not meet any of the other criteria required for taking the exam in the pre-session), he then accesses a written exam consisting of a theoretical part (maximum 60 points) and a practical					

	taken on the computer. To pass the exam, the student must achieve at least 30 points from the theoretical part and at least 30 points from the practical part. The score is multiplied by a weight of 2 and the grade is calculated according to the following scale: 120-140 points = sufficient (2) 141-160 points = good (3) 161-180 points = very good (4) 181-240 points = excellent (5)
